

Maspero Presentation

Company profile

MASPERO ELEVATORI is an Italian leading design, engineering and manufacturing Company in the field of vertical transportation systems.

Established in 1966 by Libero Maspero, today **MASPERO** is a world-wide renown point of reference for its innovative solutions, inclined lifts, non-standard and industrial elevators.

MASPERO know how is made available to assist all our Customers during the selection and for the realization of the best equipment, in order to fulfil any need.

MASPERO unparalleled quality of products relies on state-of-the-art engineering, their components -sourced from only the best suppliers- and strict quality control of the production phases. This is achieved thanks to the competence of Maspero staff, accustomed to cooperate with the greatest architects and building specialists in the world.

The global network of assembly teams, skilled supervisors and maintenance technicians, guarantees each **MASPERO** Customer flawless supplies and life-time operations.

White Collars: 38 people

Technical / Engineering Department: 12

R&D Department: 4

Sales Department: 12

Sales Administration: 3

Purchase Department: 3

Management: 4

Graduates: 80% of white collars

Facilities

The headquarter, located 30 km north of Milan and close to the Lake of Como, is split into three buildings directly connected within a single flow of materials, documents and people.

The design and engineering department is located nearby the production plant in order to enable an effective synergy between the concept and the crafting of Maspero products.

Overall, our premises occupy an area of 15,700sqm, of which over 10,000 are covered and include office buildings, warehouses, workshops and a testing area. Besides the internal production, Maspero leverages on a well established network of high quality suppliers making the whole supply chain flexible and at the same time extremely reliable.

International presence

Branches (Total: 11)

Partnerships (Total: 18)

Applications

Luxury
Infrastructure

Building
Industry

Our vertical luxury

Roger Vivier boutique, Milan

Our inclined luxury

Grand Hotel Cap-Ferrat, France

Our vertical building

Hotel Le Meridien, Turin

Our inclined building

Nardini Headquarters, Venice - Design by Massimiliano Fuksas

Our vertical infrastructure

Piazza Gae Aulenti, Milan

No. 17 custom made lifts, including

- One outdoor 8 000 kg load glass elevator
- Bespoke glass lift with no guide rails

Our inclined infrastructure

Saint Lazare metro station, Paris

Our escalators

Eataly shopping center, Milano

Our industrial elevators

- Industrial plants (cement, steel, etc.), Oil & Gas (on and off-shore), Chemical and Petrochemical industry
- Power generation
- Engineering structures such as bridge pylons, wind turbine towers, water reservoirs towers, tank farms
- Every type of harsh environment, hazardous area and IP/NEMA protected area.
